Task 1: Install Gitea and Push a Repository from the Ubuntu Server

```
umaizawaseem@ubuntu:~/Gitea$ curl -s -o /dev/null -w "Gitea HTTP status: %{http_code}\n" http://127.0.0.1:3000/
Gitea HTTP status: 000
umaizawaseem@ubuntu:~/Gitea$ docker compose ps
NAME      IMAGE     COMMAND   SERVICE   CREATED   STATUS    PORTS
umaizawaseem@ubuntu:~/Gitea$
umaizawaseem@ubuntu:~/Gitea$ curl -s -o /dev/null -w "Gitea HTTP status: %{http_code}\n" http://127.0.0.1:3000/
Gitea HTTP status: 000
umaizawaseem@ubuntu:~/Gitea$ docker compose up -d
[+] up 17/17
 ✔ Image postgres:17-alpine Pulled                                                                                    264.0s
 ✔ Volume gitea             Created                                                                                     0.0s
 ✔ Network webnet           Created                                                                                     0.2s
 ✔ Volume gitea_postgres    Created                                                                                     0.0s
 ✔ Container gitea          Started                                                                                     1.6s
 ✔ Container gitea_db       Started                                                                                     3.1s
umaizawaseem@ubuntu:~/Gitea$ docker compose ps

curl -s NAME       IMAGE              COMMAND                  SERVICE   CREATED         STATUS         PORTS

Task 2: Push the Same Repository to GitHub

```
52 updates can be applied immediately.
29 of these updates are standard security updates.
To see these additional updates run: apt list --upgradable

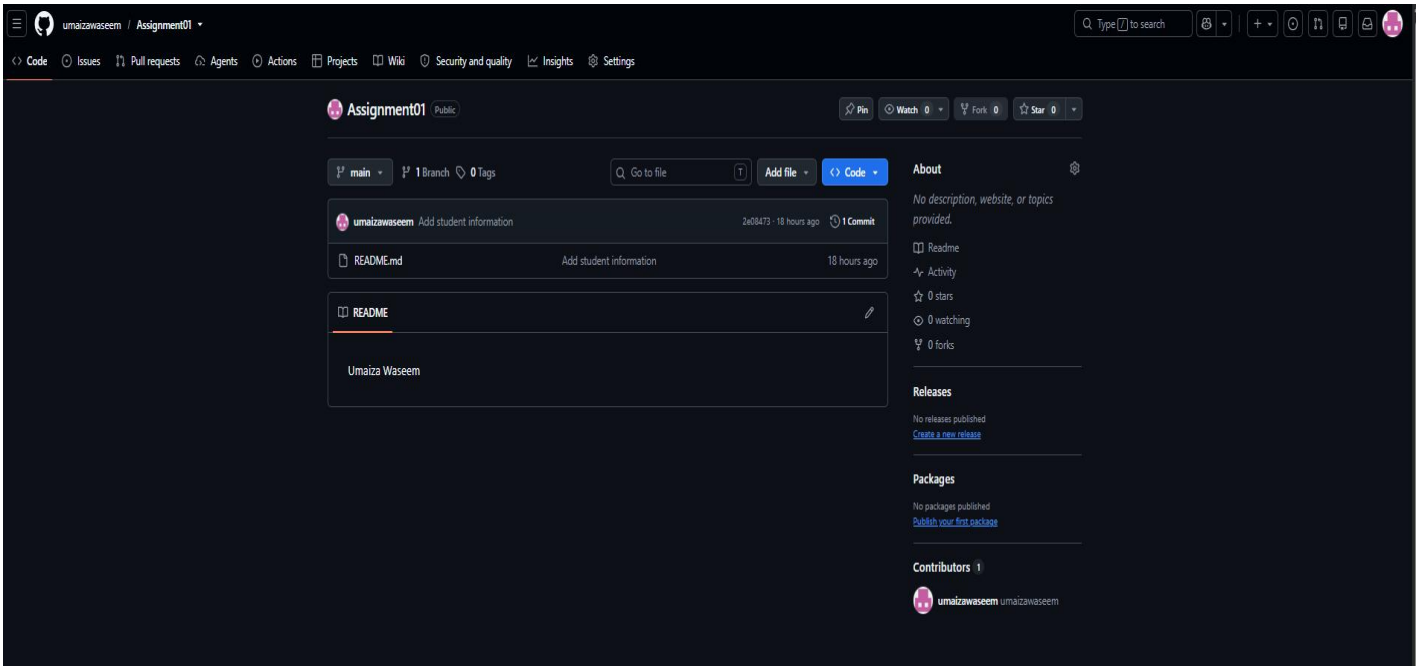

Enable ESM Apps to receive additional future security updates.
See https://ubuntu.com/esm or run: sudo pro status

umaizawaseem@ubuntu:~$ git remote add github https://github.com/umaizawaseem/Assignment01.git
fatal: not a git repository (or any of the parent directories): .git
